GENERAL WORKMANSHIP NOTES

General Instruction on Workmanship:	Use the 2 bucket cleaning system. Use one bucket for your cleaning solution and a second for clean rinse water, allowing you to rinse the dirty mop in the clean water before dipping it back into the solution, keeping your cleaning mix effective, preventing dirt from being spread around, and ensuring a truly cleaner, streak-free floor. It separates dirty rinse water from the fresh cleaning solution, so you're always applying clean product and trapping dirt in the rinse bucket.
